

Roadmap for The Mayor's Ledger

Shift the Focus: From City to Self

Turn the game into a personal finance journey where players manage their own money, not a city. Example: Personal Bank Account / Cash.

Advanced Investing

Introduce distinct asset classes like individual stocks, bonds, index funds (ETFs), and real estate.

Play Through Life's Stages

Let players move through life — from student years to retirement — with realistic money goals and challenges at each stage.

Make It Easy and Global

Upgrade the design, add helpful visuals, support multiple languages, and include accessibility features for all players.
